

_____, 2009
Dear _____,

Thank you for your donation to Bixby Robotics. Your donation has gone towards educating young minds and raising a new generation of engineers. We are grateful your help.

Our organization, numbered team 2424, nicknamed "Robot Mafia," is a club based at Bixby High School aimed at fostering and cultivating student interest in the fields of engineering and technology.

We are one of over 3000 similarly minded teams throughout the world competing in the *FIRST* Robotics Competition, working together to spread interest in science and engineering, towards the vision of a brighter, more technologically driven future. 2008 was our rookie year and our program has seen tremendous growth since the beginning.

In our 2009 season we attended two regional events, one in Dallas and one in Oklahoma City. Both events were exciting and an excellent experience. In Oklahoma City we were finalists and in Dallas we were eliminated in the quarter-finals. We won the Website Award at the OKC Regional. Although we did not make it to the World Championships in Atlanta like our rookie year, the season was still a success.

Every year Bixby Robotics rely on local companies and individuals for their support and it is only through the generous and well-intentioned donations like yours that we have become so successful. We appreciate your help.

Bixby Robotics loves to give back to those who give to them and spread the word of their generosity. If you have any questions, please visit our web site, www.bixbyrobotics.org, for our contact information. Once again, we thank you for your support.

Sincerely,

Bixby Robotics Team 2424
